OPERATING AS USUAL

OpenTaste. Online Farmers Market. Eat Better, Pay Less! OpenTaste is an innovative online marketplace for fresh food. We are re-inventing the global food supply chain, by building a platform to connect farms and foodmakers worldwide directly with consumers everywhere. Currently, OpenTaste has the most efficient fresh produce logistics service, gathering great products from over 200 farms across 6 countries, and delivering them to customers in peak condition. And we are working very hard to grow this network further. So, whether you fancy organic carrots from California, tomatoes on the vine from Australia, or artisanal apples from Japan, we offer a one stop (or one basket) solution, and deliver them to you within 36 hours from the farms. OpenTaste customers have more choices, and enjoy produce that spends a lot less time in storage. And by cutting out all farm brokers, distributors, importers and exporters, our customers always pay 30-50% less than regular supermarket prices. EAT FRESHER!
