I believe preventing crime and promoting safety are the citizens responsibility. Parents, friends and neighbors and government must work together to prevent future crime and related accidents. I see newspapers, television and Internet lacking in posting information to assist the general public in crime and safety measures. I believe the internet is our tool of the future in sending a steady stream of Safety tips crime awareness tips. Much of my crime tips were made 15 years ago and today I still create new tips daily. The website content has received thousands of likes and seen by thousands more....Thank You for your participation Rob Foraker
